DAKOTA GREENS DEFIES ALL ODDS - SCIENTISTS TESTIFY, TURFGRASS MANAGERS VERIFY

WORLD CLASS EXCELLENCE

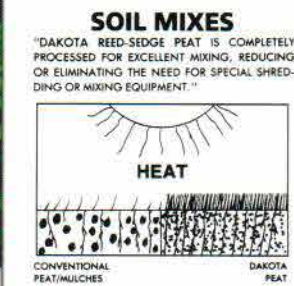

DAKOTA PEAT AND BLENDERS produces and supplies products for the golf and sports turf industry. DAKOTA PEAT is formed mainly from partially decomposed reeds, sedges, marsh grasses and other associated plants. It is carefully mined and processed to maintain its excellent horticultural attributes and unique cellular structure. Proven by science, DAKOTA PEAT ranks among the highest quality peat in the world, and exceeds all recommended standards in the horticultural and golf and sports turf industry.

GOLF COURSE CONSTRUCTION AND TOPDRESSING MIX RATIO:
10% DAKOTA PEAT
90% SAND

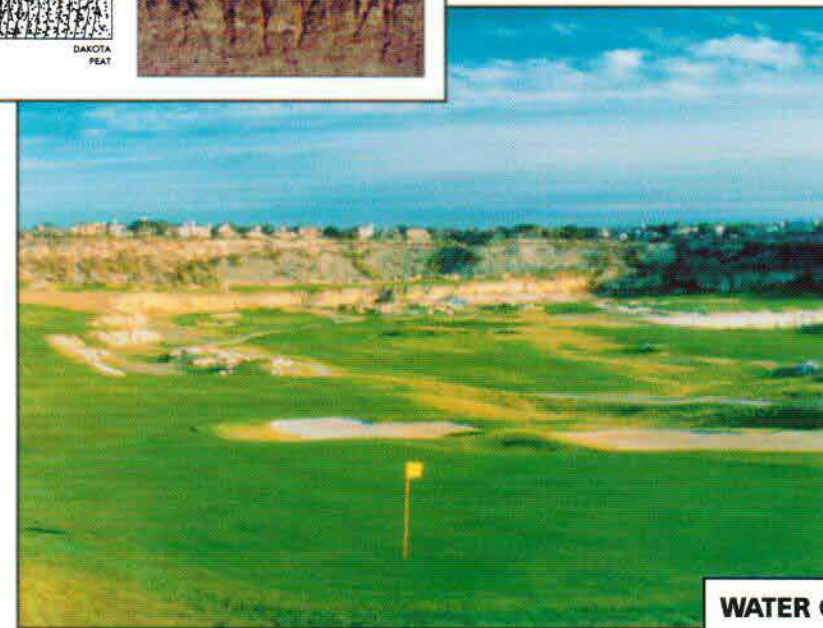

PLAYER'S DELIGHT DAKOTA GREENS

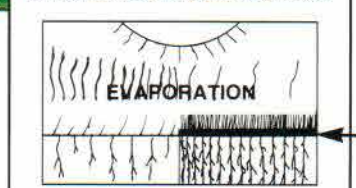

DAKOTA GREENS FEATURES THESE GREAT BENEFITS:

- World renowned playability.
- 100% natural - it has a neutral PH from 6.5 to 7 - ideal for most plants.
- Reduces incidents of pathogenic diseases.
- Growth enhancer - not growth retardant.
- Reduces thatch by creating an excellent environment for micro-organisms.
- Reduces soil compacting and resists decomposition.
- Reduces the risk of layering in greens' and tees' soil base.
- Odorless and free from harmful substances.
- Needs less fertilizer - holds nutrients better.
- Processed for excellent mixing - eliminating need for special mixing equipment.
- Retains water extremely well - requires up to 60% less irrigation.
- Provides better germination and growing.
- Re-wets easily without wetting agents.
- Reduces the need for other soil amendments.
- Topdressing sticks to the ground...it won't float away.
- Get less mud - no more tracking on greens.

Dakota Peat singled out by Stadium Managers

Grand Forks, N.D. — The Stadium Managers Association (SMA) has named Dakota Peat its official organic material and awarded it a national exclusive contract to supply SMA members.

"This is equivalent to the U.S. Golf Association making us official organic material of USGA," said Dakota Peat and Blenders President Mike Pierce. Stadium construction uses about the same amount of organic matter as an 18-hole golf course, he said.

SMA members include 100 professional stadiums and several hundred satellite practice facilities. Dakota Peat's involvement in Cleveland's new stadium "clinched the deal," Pierce said.

TURF BEYOND TOMORROW

DAKOTA PEAT AND BLENDERS is a mining and manufacturing company committed to world class quality and excellence. From the peat mine to the playoffs it all begins right here.

As seen in *Golf Course Management Magazine*, Aug. 1994

With a high nutrient holding capacity, **DAKOTA PEAT** prevents leaching and pollution making it a benefit to the environment.

DAKOTA PEAT holds vast deposits of peat in North America. Our peat is an excellent source of organic matter used to establish and improve all root zone soil mixes.

GIVING BACK TO THE ENVIRONMENT

DAKOTA PEAT strives to better the environment by returning a great portion of the land they mine for peat products to an improved game refuge and wildlife habitat for moose, deer, bear, ducks and geese, etc., with planned waterways, nesting areas, and wooded areas. All projects are privately funded but are in cooperation with the DNR wildlife.
