

General Application Rates:

Watering Plants (Soil): 1 oz REV per gallon of water

Drip System in Greenhouse: 1 oz REV per gallon of water—May be able to back down to 1/2 oz REV per gallon of water if watering frequently.

Home Transplanting: Mix REV with water at a 50/50 ratio and spray roots prior to transplanting

Field Transplanting: Put 12 oz REV in a 5 gallon sprayer and spray flats—Plant in field and add 1 quart to 200 gallons of transplant water with fertility.

Hydroponics & Aquaponics: 1 oz REV per gallon of water running through the roots

Turf Maintenance: 1.25 gallons REV per acre or 3.5 oz to 4 oz REV per 1000 sq. ft. with fertility

Overseeding & Hydroseeding: 2.5 gallons REV per acre or 7.5 oz to 8 oz REV per 1000 sq. ft. with fertility
